Summary

I'm Full-Stack Developer with 4 years of front-end and 2 years of back-end experience. Skilled in building scalable, high-performance web applications using **React**, **PHP**, and **Laravel**. I specialize in creating seamless, user-friendly interfaces and efficient, secure server-side applications.

I have contributed to projects in industries like **property management**, **HR**, **finance**, and **logistics**, optimizing performance and enhancing user experience. Committed to continuous learning, I leverage **Agile** methodologies and tools like **Jira** for efficient project delivery.

Technical Skills

- **Front-End Development:**
 - **Languages/Frameworks:** HTML5, CSS3, JavaScript (ES6+), React.js
 - **State Management:** Redux
 - **Styling:** Bootstrap, SASS/LESS, Tailwind CSS
 - **Responsive Design:** Flexbox, Grid, Mobile-first
- **Back-End Development:**
 - **Languages/Frameworks:** PHP, Laravel, CakePHP, Node.js
 - **API Development:** RESTful APIs
- **Database Management:**
 - **Relational Databases:** MySQL
 - **ORM:** Eloquent (Laravel ORM)
 - **NoSQL:** Firebase

- **Other Skills:**

- **Version Control:** Git, GitHub, GitLab
- **Agile & Project Management:** Jira, Trello, Scrum/Kanban
- **API Documentation:** Swagger, Postman

Work Experience

Full-Stack Developer

Nuwas Company, Riyadh, KSA (October

2024 – Present)

- Led the development of web applications, optimizing both front-end and back-end systems for seamless user experiences.
- Built and integrated back-end solutions using **PHP** and **Node.js** with **React** and **Vue** front-end interfaces.
- Collaborated with cross-functional teams, ensuring alignment with business goals and timely project delivery.

Key Projects:

- **Kreaa Project:** Property management system automating onboarding and property listings.
 - **Aram System:** HR management system streamlining processes and finances.
 - **Kwealth:** Real-time stock exchange platform with responsive trading experiences.
 - **Shiprex:** Logistics management platform improving shipping operations.
-

Front-End Developer

Macher, Cairo, Egypt (April 2022 –

September 2023)

- Developed responsive, user-focused web interfaces for e-commerce and coworking platforms.
- Worked closely with back-end developers to optimize API integration and enhance performance.

Key Projects:

- **Golden Deal:** E-commerce platform with user authentication and secure payment integration.

- **Oz-Cowork:** Coworking space platform for booking and scheduling.
 - **Dbay:** Online platform for a North Coast village project featuring property listings and community updates.
-

Intern

Altslutions Company, Cairo, Egypt (June 2019 –

September 2019)

- Assisted front-end projects, improving development workflows and code quality.
-
