Professional Summary

Passionate Full-Stack Software Engineer with 4 years of experience in developing efficient, high-performing web applications. Expert in both front-end and back-end development, utilizing technologies like React, Vue, Node.js, and PHP to deliver scalable, user-friendly applications. Successfully led projects across various industries, including property management, HR, stock exchange, and logistics, with a track record of enhancing performance and streamlining workflows. Certified in PHP, JavaScript, and Vue.js, with a commitment to continuous learning and a focus on delivering impactful, user-centric solutions.

Technical Skills

- Front-End: HTML5, CSS3, JavaScript (ES6+), React, Vue, Angular, jQuery, Bootstrap, SASS/LESS

- Back-End: Node.js, Express.js, PHP, RESTful APIs, Laravel

- Database: MySQL, MongoDB, PostgreSQL

- Tools: Git, Webpack, Docker, npm

- CMS: WordPress (Custom Themes & Plugins), WooCommerce

- Cloud Platforms: AWS, Heroku, Vercel

- Design & UX: Responsive Web Design, UX/UI Design, Wireframing, Prototyping

---

Professional Experience

Full-Stack Developer

October 2024 – Present | Nuwas Company, Cairo, Egypt

- Led full-stack development of dynamic web applications, improving performance and delivering optimized user experiences.

- Built complex back-end systems using PHP and Node.js, seamlessly integrating with React and Vue-based front-end interfaces.

- Collaborated with product teams to develop innovative technical solutions aligned with business requirements, enhancing project delivery.

Key Projects:

- Kreaa Project: Developed a property management system that automated client onboarding and property listings, enhancing client satisfaction and operational efficiency.

- Aram System: Delivered an HR management system that streamlined processes and minimized errors in data handling, resulting in smoother operations.

- Kwealth: Created a stock exchange platform with real-time trading capabilities, providing users with a seamless and responsive experience.

- Shiprex: Designed a logistics management system that improved shipping operations, leading to more efficient management of shipping activities.

Frontend Developer

April 2022 – September 2023 | Macber, Cairo, Egypt

- Engineered responsive web interfaces that enhanced user interaction and engagement across e-commerce and coworking platforms.

- Integrated front-end interfaces with APIs and back-end services, optimizing overall application performance for smoother user experiences.

- **Implemented responsive front-end interfaces** using React and Vue, delivering seamless user experiences across devices, improving customer satisfaction.

- **Collaborated closely with cross-functional teams**, ensuring alignment between technical development and business goals, resulting in timely and impactful project deliveries.

-

Key Projects:

- Golden Deal: Developed a full-featured e-commerce website with user authentication, shopping cart functionalities, and secure payment integration.

- Oz-Cowork: Designed a coworking space platform that facilitated seamless booking and scheduling, improving client experience.

- Dbay: Developed an online platform for a North Coast village project, incorporating property listings, community updates, and event management.

Intern

June 2019 – September 2019 | Altsluitions Company, Egypt

- Gained hands-on experience in web development, contributing to both front-end and back-end projects.

- Assisted senior developers in debugging and optimizing code, enhancing the efficiency and quality of development workflows.

Education

Bachelor's Degree in Management Information Systems

Modern Academy Maadi, Cairo, Egypt

Graduated: 2020

- Studied key areas in web development, database management, and user experience design.

Certifications
