Ahmed Ashraf Ramadan

SENIOR FRONT-END ENGINEER

01147266169 | ahmedashraf2398@gmail.com | **Portfolio | Github | Linkedin**

PROFESSIONAL SUMMARY

Senior Front-End Engineer with 5+ years of experience architecting and leading React applications across FinTech, RegTech, and SaaS. Owned design systems and frontend architecture for complex, data-intensive products. Additional experience with Next.js, Angular, and Vue, plus full-stack work across Node.js and PHP.

PROFESSIONAL EXPERIENCE

Senior Front-End Engineer | EON Tech *Oct 2025 - Present Jeddah, KSA (Remote)*

- Lead a frontend team of 6 members on Kyc360, a KYC/KYB and RegTech compliance platform: gather requirements from business stakeholders, define the architecture, and own a shared design system across its three services (admin, tenant, and investor platforms).
- Develop the investor-facing frontend for Tarh, an investment platform: a real-time dashboard and an SSR public site, with type-safe API integration, in close collaboration with the backend and business teams.
- Architect the React frontend of a medical SaaS platform, covering patient management and clinical workflows with a reusable component system and structured state management.
- Create shared components and dashboard modules reused across multiple products, with documented guidelines that speed up development and keep the UI consistent across the team.

Senior Front-End Engineer (Part-Time, Remote) | Key Frame *Jul 2025 - Mar 2026 Cairo, Egypt · Remote*

- Architected a reusable, schema-driven Form Builder and Page Builder supporting 16 field types, so non-technical users can create dynamic pages and forms without code across multiple admin dashboards.
- Worked with designers, backend engineers, and stakeholders to turn content-management needs into configurable features, delivered end to end.
- Liaised with the payment gateway provider to gather integration requirements, then integrated a secure online payment flow (KNET) into the Kuwait Food Bank platform to process donations.
- Integrated Google Analytics on the public website, giving stakeholders clear visibility into traffic, engagement, and user behavior.

Senior Front-End Engineer | Nuwas *Sep 2023 - Sep 2025 Jeddah, KSA*

- Owned the frontend architecture of Kwealth, a FinTech trading platform, building modular, reusable React systems for real-time market dashboards, stock screening, charting, alerts, and a trading simulator.
- Led a frontend team of 3 members on ARAM, an HR management platform: architected 12 modular React modules (payroll, attendance, recruitment, and more), including a drag-and-drop workflow builder for non-technical users.
- Built a UI component library from the ground up, adopted across 4 products, with typed APIs and usage guidelines that cut feature build time by ~40-50% and kept the UI consistent.
- Optimized rendering for large datasets and high-frequency updates using memoization, lazy loading, and structured state management, keeping the UI smooth under heavy data load.

Front-End Developer | Macber *Sep 2020 - Feb 2021, Apr 2022 - Sep 2023 Cairo, Egypt*

- Built and maintained React single-page applications across 8 e-commerce and enterprise projects, developing reusable UI components shared across features.
- Collaborated with designers and backend engineers on frontend architecture, API integration, and state management for client projects.
- Delivered responsive, cross-browser layouts built from CSS fundamentals, following accessibility best practices.

Front-End Developer Intern | Altsolutions Company *Jun 2019 - Sep 2019 Cairo, Egypt*

- Built responsive UI components for client-facing web applications, translating UI/UX designs into clean, reusable code.
- Worked in an Agile team, taking part in sprint planning, stand-ups, and code reviews.

EDUCATION

Bachelor's Degree in Management Information Systems
Modern Academy, Maadi, Cairo, Egypt | Oct 2016 - Jun 2020

CORE TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, PHP
- Frontend: React.js, Next.js, Redux Toolkit, React Query, Angular, Vue.js, React Native
- Backend: Node.js, Express.js, Laravel, REST APIs
- Markup & Styling: HTML5, CSS3 (Flexbox, Grid), SASS, Tailwind CSS, Material UI, Bootstrap, Responsive Design
- Architecture: Design systems, schema-driven UIs, real-time data (WebSockets), performance optimization

RELEVANT PROJECTS

- **Kwealth – FinTech Trading Platform** Real-time React.js trading dashboards with WebSocket-driven live data and an integrated AI-powered assistant in the UI.
- **Kyc360 – Unified KYC & RegTech Compliance Platform** Schema-driven platform unifying identity verification, sanctions/PEP screening, and risk assessment into configurable, dynamic workflows including a rules-driven risk engine, flexible approval stages, and real-time monitoring/alerts, built to satisfy CMA and AML requirements.
- **Aram – HR Management System (Angular)** Designed a custom drag-and-drop workflow builder that lets non-technical users configure payroll, attendance, and employee-process flows a builder tool in the same spirit as configurable form/workflow design.
- **Kreaa – Real Estate Management (Saudi Market)** Built React.js dashboards including a localized Hijri date-picker component for the Saudi market real-world localization work beyond simple string translation.
- **Tarh Platform – Real Estate Investment** Vue.js investor dashboard plus a Next.js/SSR public site; integrated real-time investment-tracking APIs with typed data contracts between frontend and backend.
- **Water Valley – Mobile Lab App (React Native)** Mobile app for lab test scheduling and result tracking, used by field staff relevant to teams supporting both web and native surfaces.
